

Total Enrollment Solution

Small group enrollment goes digital

Total Enrollment Solution (TES) is an online enrollment tool for small group that creates a better user experience for brokers and business decision-makers that are shopping, comparing and enrolling in health benefits.

Experience the ease of online quoting and enrollment and try TES today.

Why TES?

Arkansas Blue Cross and Blue Shield and Health Advantage wanted to make it easier for agents to quote and enroll groups — and we wanted to bring small group enrollment into the 21st century for our group administrators. TES made all of it possible.

Faster and more automated – TES eliminates manual processes that slow down small group enrollment, bypassing time-consuming steps and ensuring that ID cards are triggered to be printed and mailed seconds after enrollment is complete.

Greater accuracy – An electronic enrollment eliminates manual keying of data from paper to electronic records. When you upload a clean census onto TES, you kick start a more accurate enrollment process.

Convenience, convenience, convenience – TES makes it easier to quote more plans side-by-side, drill down into the plans, add or remove people from the census and see composite vs. age-band rates. Group administrators will receive an email with a link to review and confirm a plan. Payment can be made online too, by credit card or bank draft.

It's paperless! – Have we said it's paperless yet? No more shuffling paper applications. TES allows you to email plan options, review online, add or remove plan members and save digital copies of everything.

TES is faster, more accurate and more convenient for agents and small groups.

Questions?

Talk to your Arkansas Blue Cross sales or agent-broker representative about quoting and enrolling your small groups on TES.

TES Tackles Ancillary

Enroll your small group in more than just health benefits. TES allows you to enroll in medical, dental, vision and life benefits all in one place.
